Crystal structure the Fab fragment of matuzumab/

Characteristics
Classification
CompoundRelease Date: 15-Apr-2008 Exp. N
Resolution: 2.15 Å

Immune System

Molecule: Matuzumab Fab Ligh
Polymer: 1 Type: polypep
Chains: L
Other Details: Human/mouse chime
monoclonal antibodyMolecule: Matuzumab Fab Hea
Polymer: 2 Type: polypep
Chains: H
Other Details: Human/mouse chime
monoclonal antibody**Authors** Ferguson, K.M. , Schmiedel, J.Crystal structure the Fab fragment of matuzumab
with domain III of the extracellular region of EGFR**Characteristics**
Classification
CompoundRelease Date: 15-Apr-2008 Exp. N
Resolution: 3.20 Å

Immune System/ transferase

Molecule: Matuzumab Fab Ligh
Polymer: 1 Type: polypep
Chains: B, L
Other Details: Human/mouse chime
monoclonal antibodyMolecule: Matuzumab Fab Hea
Polymer: 2 Type: polypep
Chains: C, H
Other Details: Human/mouse chime
monoclonal antibodyMolecule: Epidermal growth fac
Polymer: 3 Type: polypep
Chains: A, D
EC#: 2.7.10.1
Fragment: sEGFR domain III**Authors** Ferguson, K.M. , Schmiedel, J.

1

The RCSB PDB is managed by two members of the RCSB:
Rutgers and UCSD, and is funded by NSF, NIGMS, DOE, NLM, NCI, NINDS, and NID
